

T500 GLASS, CAN AND PET CRUSHER

CRUSHER

- 4 ½ inch cylinder
- Clear & easy operator controls
- Fully protected motor & hydraulic system
- Remote control as standard
- Audible & flashing warning lamp
- Unique "safe area" ensures no broken glass escapes to cause injury
- Hopper designed to customer requirements
- Theoretical through put of 2 tonnes per hour on full glass bottles
- Hardox liner
- Extra heavy duty wear plates

The T500 is a heavy duty machine designed mainly for breweries and drinks manufacturers. The T500 crusher dramatically reduces the volume of waste cans and glass bottles by 4:1. Built to the same high specification as our flagship model the T1000 model, only on a smaller scale, this machine comes as standard with 24v operating controls, glass, can and PET functionality and is fitted with extra heavy duty wear plates internally to deal with harsh abrasion. The 500 has a theoretical throughput of up to 2 tonnes of full glass bottles per hour.

Model	T500
Motor (kW)	11
Compaction force	50 tonne
Crushing ratio	4-1
Working pressure	1400 - 2000 P.S.I
