

TIPPING SYSTEMS

INTRODUCTION

Tipping systems enable customers to safely and efficiently empty their waste containers. Keljay design and manufacture a large range of tipping devices that are tailored to our customer's individual requirements, from systems that will lift multiple styles of waste containers to ones that will traverse along a 32-yard container. Whatever your tipping requirements Keljay's got you covered.

As safety is our number one priority all of our tipping systems are fitted as standard with fully interlocked personnel safety enclosures, E-stops and dual safety monitoring circuits. We can also offer additional safety features such as key replacement interlocks, key switches and shot bolt systems.

ALL OF OUR TIPPING SYSTEMS ARE FITTED WITH FULLY INTERLOCKED PERSONNEL SAFETY ENCLOSURES AS STANDARD

OUR TIPPING SYSTEMS

Waste containers our tipping systems accommodate:

- 600ltr bins
- 770ltr bins
- 1100ltr bins
